Shri Krupa S

Chennai, India | (M) (+91) 9047875828 | (E) shri.sk.krupa@gmail.com

Summary

- Senior Full Stack Engineer with 5+ years of experience building, stabilizing, and scaling revenue-critical SaaS platforms in the retail analytics domain.
- Proven expertise in leading complex system refactoring, performance optimization, and large-scale production stabilization (100+ critical issues resolved) across frontend and backend architectures.
- Trusted to own high-impact modules within globally distributed teams (India, UK, USA), driving Agile delivery, architectural improvements, and long-term system resilience.

Skills

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), TypeScript
Backend: Node.js, Express.js, TypeORM, GoLang
Databases & Data: PostgreSQL, SQL, BigQuery
Automation & Testing: Cypress, Jest, Sinon
Cloud & Hosting: Google Cloud Platform (GCP), Firebase
DevOps & CI/CD: Jenkins, Git, GitHub, Bitbucket
Tools & Collaboration: VS Code, JIRA

Experience

Full Stack Developer | Nielsen IQ — Chennai, India
June 2023 — Present
Product: Byzzer, a high velocity NIQ product, focused on democratizing retail data access for small and mid-market CPG brands.

- Took ownership of the highly complex and revenue-critical Data on Demand (DOD) module, stabilizing and modernizing one of the most used & high revenue generating system in the product.
- Led end-to-end frontend refactoring using TypeScript, modular architecture, strict typing, custom hooks, and performance optimizations (virtual scrolling, memoization, context-based state management).
- Designed and implemented a caching strategy for multi-market data retrieval, significantly reducing redundant API calls and improving UI performance across widgets and reporting workflows.
- Spearheaded production stabilization efforts, leading resolution of 100+ critical bugs across two sprints, driving defect count down to single digits.
- Coordinated closely with onshore architects and offshore engineers, leading code reviews, knowledge transfer sessions, and cross-team collaboration under high-pressure release timelines.
- Contributed to backend data engine processing, query builders, scheduled and ad-hoc report generation, and BigQuery optimizations within a distributed microservices architecture.
- Created comprehensive end-to-end technical documentation, local setup guides, and KT recordings for a previously undocumented system, reducing knowledge silos and improving team onboarding.
- Playing a key role in ongoing re-architecture efforts to improve scalability, reduce Sev1 incidents, and transition the module toward a more stable, collaborative engineering model.

Technical Lead (Additional Role) | Tata Consultancy Services — Chennai, India
January 2022 — May 2023
Product: Byzzer, a high-velocity analytics product focused on actionable business intelligence.

- Stepped into the Technical Lead role during a leadership gap, becoming the youngest lead to manage a global team (with experience range of 1–20+ years) within the NIQ account.
- Led Agile delivery (sprint planning, grooming, estimation, stand-ups) while continuing hands-on development, ensuring zero impact to quality or timelines.
- Proactively addressed sudden resource shortages by partnering with TCS Resource Management Group (RMG), screening and interviewing 270+ candidates to stabilize delivery.
- Mentored junior engineers and fresh hires in the PERN stack, accelerating team capability while strengthening my own technical depth.
- Managed governance activities including audits, performance metrics, risk mitigation, resource allocation, and executive reporting to senior leadership (India & USA).
- Played a key role in sustaining and scaling the high-revenue Byzzer engagement, ensuring uninterrupted delivery for a strategic NIQ client.

Full Stack Developer | Tata Consultancy Services — Chennai, India
January 2021 — May 2023
Product: Byzzer, a data-driven market analytics platform in the United States.

- Played a key role in scaling Byzzer's Customer Service application, improving cross-team collaboration and reducing issue turnaround time in a distributed agile team (India, UK, USA).
- Owned and delivered critical modules, including a high-sensitivity access feature with strict privilege control and zero-error tolerance.
- Implemented strong security architecture with role-based access, guarded routes, and middleware validations to protect sensitive data.
- Built highly customizable, downloadable reporting features for Sales and Product teams, optimizing large-data report generation for faster response times.
- Ensured a stable, high-quality codebase through automation testing (Jest, Cypress) and adherence to strict code review standards.

Education

College of Engineering, Guindy, Anna University — India
B.E.: Computer Science and Engineering | High Academic Score — CGPA 9.01

- Ranked among the Top 5 Final Year Projects at Anna University (2020) for "Software Defined Networking and Security."

Accomplishments and Awards

- Rising Star Award — NIQ Global Technology Awards (Sep 2025)
- Best Young Talent Award — TCS Global Town Hall
- Helpful Hagrid Award — TCS NIQ Client Appreciation (Byzzer)
